Q16. Mayor Mamdani wants to raise the personal income tax for New York City residents earning more than one million dollars, but to do that, he needs approval from the State Legislature and Governor. Mamdani says that if the state doesn't allow the City to raise taxes on millionaires, he will have to raise property taxes on all New York City property owners. Do you think the Governor and Legislature should or should not allow New York City to raise the personal income taxes of its residents earning more than one million dollars?

Q17. On another topic, state legislators - assemblymembers and senators - are elected for two-year terms. Some have suggested making the term of state legislators four years, instead of two. Would you prefer to see state legislators continue to serve two-year terms or would you prefer that they be elected to four-year terms?

This Siena Poll was conducted March 23 - 26, 2026, among 804 New York State Registered Voters. Of the 804 respondents, 528 were contacted through a dual frame (landline and cell phone) mode (158 completed via text to web) and 276 respondents were drawn from a proprietary online panel (Cint). Telephone calls were conducted in English and respondent sampling was initiated by asking for the youngest person in the household. Telephone sampling was conducted via a stratified dual frame probability sample of landline and cell phone telephone numbers weighted to reflect known population patterns. The landline telephone sample and the cell phone sample was obtained from Marketing Systems Group (MSG).

Interviews conducted online are excluded from the sample and final analysis if they fail any data quality attention check question. Duplicate responses are identified by their response ID and removed from the sample. Three questions were asked of online respondents, including a honey-pot question to catch bots and two questions that ask respondents to follow explicit directions. The proprietary panel also incorporates measures that safeguard against automated bot attacks, deduplication issues, fraudulent VPN usage, and suspicious IP addresses. Coding of open-ended responses was done by a single human coder.

Data from collection modes was weighted to balance sample demographics to match estimates for New York State's population using data from the Census Bureau's 2023 U.S. American Community Survey (ACS), on age, region, race/ethnicity, education, and gender to ensure representativeness. The sample was also weighted to match current patterns of party by region registration using data from the New York State Board of Elections. It has an overall margin of error of +/- 4.2 percentage points including the design effects resulting from weighting. Sampling error is only one of many potential sources of error and there may be other unmeasured error in this or any other public opinion poll.

The Siena Research Institute (SRI) powered by ReconMR is directed by Donald Levy, Ph.D.. SRI conducts political, economic, social, and cultural research primarily in NYS. SRI, an independent, non-partisan research institute, subscribes to the American Association of Public Opinion Research Code of Professional Ethics and Practices.
