TI Disclosure Elements	
Poll Name	ReconMR Texas Recontact Study
1. Data Collection Strategy	A study contacting registered Texas voters who had taken a ReconMR Texas poll in the previous four months.
2A. Research Sponsor	ReconMR
2B. Research Conducted By	ReconMR
3. Measurement Tools/Instruments	Click HERE to see the questionnaire
4. Population Under Study	Likely Texas Voters of Previous Poll Respondents
5A. Sampling Method	ReconMR contacted respondents who took part in a ReconMR Texas Poll in June, July, September, or October. In total, 2,670 voters took part in the initial polls and were included in the recontact study.
5B. Sampling Specification	The sample was of voters who previously completed one of our Texas pre-election polls. The initial poll sample was a registration based sample. Only registered voters in the state voter file are in the universe. The initial telephone sample was acquired from the L2 database of registered voters.
5C. Quotas	Quotas were not used during data collection.
5D. Incentives	No incentives were offered or paid to survey respondents.
6A. Modes of Data Collection	Data was collected over the phone by live telephone interviewers and online via text messages with customized survey invitations.
6B. Languages Offered	Interviews were conducted in English and Spanish.
7. Dates of Data Collection	The survey was fielded between October 26-29, 2026.
8A. CATI Surveys	Surveys completed with a live telephone interviewer: N = 461
8B. Text to Web Surveys	Surveys completed with online from a text message invitation: N = 235

8C. Web Panel Surveys	Surveys completed with online via an online panel invitation: N = 0
8D. Margin of Error	This study is not representative of the entire electorate and it is not possible to calculate a conventional margin of sampling error. This study may be more likely to over-represent the most politically engaged voters.
8E. Data Coding	All coding of open-ended responses were conducted by human coders.
9. Weighting Procedures	Data were not weighted; this study is not representative of the entire electorate.
10. Data Processing and Quality	Random quality assurance monitoring is conducted to review telephone interviews. Data are only discarded in the event that interviewers fail key quality benchmarks.
11. Statement of Limitations	Sampling error is only one of many potential sources of error and there may be other unmeasured error in this or any other public opinion poll. Real-world error includes sources of error beyond sampling error, such as nonresponse bias, coverage error, late shifts among undecided voters and error in estimating the composition of the electorate.
12. AI Use Disclosure	This research included no use of AI in questionnaire development, data collection, data analysis, or presentation of data.
